■ About Us

Our company's character is defined through the essential and enduring tenets and principles that guide our work and relationships with our clients and each other. They will not be compromised for financial gain, or short-term expediency. These chosen values are best articulated through a pledge that we make to each of our valued clients:

Our Pledge:

We are dedicated in assisting our clients in making their lives easier by using online systems in their day to day lives to credit score and vet their potential clients. We believe in long terms relationships with our clients, no matter where you are situated in South Africa and to invest heavily to improve our online systems so that we will have the leading edge over our competitors and to keep our prices below the normal retail of other online service providers.
